

RET

Research Experience for Teachers for High School Science Teachers

Materials Research Science and Engineering Center Michigan State University

Summer 2002

Application Deadline April 15, 2002

The Materials Research Science and Engineering Center (MRSEC) at Michigan State University announces a Research Experience for Teachers program to be held in the summer of 2002. High school science teachers are invited to apply.

During the four- to eight-week summer session, teachers will be able to devote attention to education research in the context of a scientific research environment. They will have the opportunity to collaborate with the science education community within the MSU MRSEC program, as well as to interact with other RET participants and REU students.

Our RET program is designed to build bridges between materials, chemistry, physics and engineering research and K-12 education; contribute to the intellectual, research and educational goals of MRSEC; involve

Characterization of polyelectrolyte membranes

educators in the research community; and enhance the quality of precollege education. Teachers selected for the RET program will receive a weekly stipend of \$1,000 and may register for MSU graduate credit.

The duration of the RET program is flexible. **Apply by sending your CV (resume), references, and proposed summer schedule by April 15, 2002 to:**
