

*TeV4LHC – are there uncovered issues ?*

*The hope here is to stimulate ideas*

*Jimmy Proudfoot*

*(ANL)*

## *I Think the Answer is yes ?*

- *We can fit the underlying event at 1.9TeV .. how well can we predict it at 14TeV?*
- *Many production processes are different at the LHC c.f. The TeVatron*
  - *Are there some for which we can obtain a more direct comparison (e.g. In a limited kinematic region)*
- *What are the jet  $E_t$  spectra and multiplicity for the processes that we will need to understand along the way to discovering SUSY:*
  - *W, Z, gamma,  $T\bar{T}$*
